Your new Favicon

What is a Favicon?

Favicon (pronounced fav-eye-con) is short for 'Favorites Icon.'

A Favicon is a multi-resolution image included on nearly all professional developed sites. Within Internet Explorer the Favicon is displayed on the Address line and in the Favorites menu.

The Favicon allows us to further promote your site, and to create a more customized appearance within a visitor's browser. Often, the Favicon reflects the look and feel of the web site or the organization's logo.

How to see the your Favicon

If you have gone to your website home page and there you can not see your logo or image favicon please follow these steps;

1. find your website link in the '*Favorites*' folder at the top of your browser
2. '*Right click*' on the link and select '*Delete*'
3. Once your have removed the link, re-ad it by again clicking on '*Favorites*' at the top of your browser, and then '*Add to Favorites...*'

Once the link has been re-added try refreshing the page and finding the link in Favorites, you should now see your logo or small image next to the title or web address of your website.
